About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

My dear Sir

On the other side you have
a list of all Dillwyn's *Conferva* that
I find not marked in my copy as fig?
in Bot. — As to maps, I recollect
Dicranum hyperboreum, & *tamarindifolium*
& *Nypnum flagellare* H. Brit.
& — *Thuringicum* Musc. Nib.
also *Bryum cubitale*, as all
great desiderata. — I cannot
just now make out a complete
list. — My wife desires her best
thanks & kind regards to Miss Turner
for her very excell^t etching — With
our united best respects to all the
family. D. Sir ever yours

J. H. Smith
