We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

My dear Sir

Ramsgate 10. July 1841

Your kind note was enclosed to me in a parcel from Town on Friday, which said parcel was not opened until yesterday afternoon - I need not say that it would have afforded me much pleasure to have accepted Mr. Jeremys invitation, coupled as it was with the additional inducement of a ride with you to his House - I expect to be in town to-morrow & should I be again favoured with an invitation from the worthy Magistrate, I shall be most happy to accept it.

Believe me to remain

My dear Sir

Yours most truly

N. P. Ward
