About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Schenectady, N. Y., May 30th 1897.

Frederick V. Coville, Esq.

Curator of Botany,

Washington D. C.

My Dear Mr. Coville:

I thank you very much for your cooperation in receiving from Dr. J. H. Rose such a nice lot of botan. specimens and hope to be able to return something in exchange this season. How is the *Asperula odorata*? We use it now frequently with Moselle Wine. Will you pay your promised visit to us this summer? Our camp on the Mohawk will be open after the 4th of July. Please, remember me to Mrs. Coville and the dear little ones. With many regards

Yours very Sincerely

J. H. Wille.
