About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

GAZETTE
OFFICE

Rev^d Mr Harrison

Secretary
Durham

Dear Sir

Yesterday evening, I received the
box of plants. You were so polite as
present me with them at Colyton,
for which I again thank you, accom-
panied by a letter containing a
hint with regard to Lichen gardens
— believe me, my only inducement
for packing it among the leafy riches
I collected with you, was for fear
of its being rubbed & of course I would
— & from a wish of showing it to
my botanical friends here, as soon
as arrived — by a person
who was at Park a few days ago

I'm told that *Anchusa officinalis* is in
flower. I intend going for it some day
next week - specimens. I shall myself
will be considered an acquisition to
your Herbarium - Dr. Day's Synopsis
has been written for by my bookseller
but should be not be able to procure
it - I make no doubt the Society will
have no objection to send you that
week, together with *Hesperis Plantaginum*
Business has as yet prevented me
writing your friend Mr. M'Isinger
but I intend doing it tomorrow -
of the Mr. Headlams. took leave
on Sunday & today, I believe,
they sailed for the Malak

In expectation of a visit from you
in August or September ... I am

Dear Sir
Yours most obedt servt
Jas H. Kunk
