We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Frederick J. Coville

Botanist

U. S. Dept. of Agriculture

My Dear Sir,

Your favor of January 29th

informing me that the "Herbarium Vol. IV. Botany of the Death Valley Expedition" had been sent to my address at Santa Barbara, is rec^d and I found the Vol. awaiting me when I went home.

Thanking you for your courtesy

I am

Very respectfully yours

Lorenzo G. Yates.

P.S. I have a few duplicate specimens of Ferns which I collected on Santa Rosa Island. *Polypodium Seoulerii*, fine *Adiantum pedatum* and *Asp. Filix-femina* would you like some of them? if so please send me thanks to forward by mail
