About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

June 29, 1955

Dr. W. W. Ray, Chairman
Department of Botany
The University of Nebraska
Lincoln 8, Nebraska

Dear Dr. Ray:

Thank you for your letter concerning Dr. Edward E. Dale, Jr. We felt that he was a very good man, but he did not have quite the background and experience we wished to find. We have employed Dr. Edwin Alder and hope that he works out well with us.

With personal regards and good wishes, I am

Very truly yours

Delbert Swartz
Chairman

Dr. W. W. Ray
Department of Botany
University of Nebraska
Lincoln, Nebraska

Dear Dr. Ray:

Recent Federal action under Title IV. has made it possible for us to proceed with our new Ph.D. program, which had been held in abeyance until such funds were assured.

We have vacancies for Graduate Assistants in both teaching and research and they carry stipends of \$2000 for the school year. We realize that we are trying to find people at a very late date, but are still hopeful that we may be successful in so doing.

If you have any students who might be interested, and for whom you could give a good recommendation we will be glad to have their applications. We have a good staff and exceptionally fine equipment.

Dr. Dale joins me in extending regards to you.

Very truly yours,

Delbert Swartz
Chairman

FAYETTEVILLE

DEPARTMENT OF BOTANY
AND BACTERIOLOGY

April 21, 1961

Dr. W. W. Ray
Department of Botany
University of Nebraska
Lincoln, Nebraska

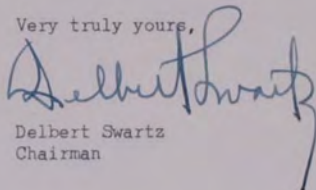

Dear Dr. Ray:

We are looking for an Instructor in Botany, starting in September 1961. We prefer a person with the Ph.D., but will consider competent persons who may not have completed that degree. Of course, the salary will vary with the training and experience of the person we select. However, we are prepared to offer \$5400 for nine months to a person with the doctorate. Ordinarily our staff members receive an additional 15% for summer school. This is not guaranteed, but we have always taken care of our people in the summer.

We would prefer a person who can help in the morphological and cytological areas, but we may not be able to find someone with the exact background we need. Since the major teaching responsibility will be in our large course in General Biology and/or in General Botany, we would be pleased to have applications from persons interested in those areas too.

We will appreciate any help you can give us in locating a good person. With personal regards, I am

Very truly yours,

Delbert Swartz
Chairman

Dear Dr. Ray:

Thank you for your letter in behalf of Mr. Ron Raschke. We were fortunate enough to find a Ph.D. for our vacancy, and naturally had to pass Mr. Raschke by. We appreciate your help.

With personal regards, I am

Very truly yours,

Delbert Swartz
