About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

The University of Sydney

2nd March, 1951.

Mr. Arthur J. Eames,
Department of Botany,
Cornell University,
New York State College of Agriculture,
Ithaca, New York.

Dear Mr. Eames,

Many thanks for your letter; I am extremely sorry you will not be coming this year, as we were all looking forward to your visit.

I have recently advertised for a lecturer in botany, preferably morphology, but have had no luck. Do you know of any bright young person who might be interested? The salary is £750 - £1000 Australian. Unfortunately morphologists are rare birds these days.

I hope your visit is only "delayed".

With best wishes,

Yours sincerely,

Alan Burges

Professor of Botany.
