About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Professor A.J. Eames,
Cornell University,
New York State College of Agriculture,
ITHACA, NEW YORK.

Dear Professor Eames,

I am most grateful for your help regarding the lectureship.

I have received to day from Hotchkiss details of his career and interests. I like the look of his application and will place the matter before the Committee as soon as possible.

We were all very sorry to hear that the Fullbright did not come off and we hope for better luck next time.

Yours sincerely,

Alan Burges

Professor of Botany

P.S. I will arrange for morphology
