About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Sept. 11th
1956

Dear Dr. Tames,

I have
come across references to
a paper of yours which I
have been unable to trace.
Since it seems to have
a good deal of interest
to me I am writing to
ask if you can let me
have a report, or give
me the full reference.

Gunderson, 1954 simply cites
it: "Floral anatomy as an
aid in generic limitation. 1953."

Needless to
say I shall be most
grateful for your help
in this matter.

When are we to see the
second volume of your
"Morphology"? Soon, I hope.

Kindest regards

Yours sincerely,

A. W. S. S. S.

(Prof. of Botany)
