We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

J. B. HOUGH, M.D.
Analytical and Consulting Chemist
and Toxicologist.

Office of
Miami Chemical Laboratory,

Room 16, Johnston Building,

CINCINNATI, O.

Waynesville
Warren Co. Ohio.
Mar. 29, '87.

Prof. C. E. Bepey.

Dear Sir, I send
you for a name (if not
new) or for reference to some
published description, a
mould which has developed
since last fall in total and
continued darkness on a
boiled solution of Stevens
Family (black) Dye which was
placed not in a covered
granite ware Kettle and
not opened until today.
I am not very highly

learned in these lower orders.

I have your Botany, with which I am very much pleased.

If you can find time for an early reply you would place me under thankful obligations.

If I could return any favors I would be glad to do so.

My "hobby" at present is aquatics.

Digitized by Hunt Institute for Botanical Documentation

J. D. Mough.

Wanted: - water plants for a private collection.

If the person who receives this can furnish living, healthy specimens, suitable to propagate, and will please return the following list with prices marked opposite the names, or hand to some one else who will do so, the favor will be properly acknowledged.

Address. Dr. J. B. Hough.
Waynesville, Warren Co. W.

Andromeda hyemalis.
Azolla Caroliniana.
Brasenia peltata.
Callitriche verna.
Chrysosplenium Americanum.
Elodea peltata.
Gypsochroma Nuttallii.
Hydrocotyle
Limnanthemum lacunosa.
Limnolobos tenuifolia.
Najas major or flexilis.
Nitella: any species.
Pontederia cordata.
Proserpinaca palustris.
Podostemum ceratophyllum.
Salvinia natans.
Vallisneria spiralis.
Wolffia: any species.
What other rare aquatic can you furnish?
What species of myriophyllum, potamogeton and heteranthera?

Lithophyte print.
