About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Boston, June 23rd

Dear Prof;

I enclose a few specimens of *Accidium Berberidis* which you asked for. I am at work on fungi particularly Uredineae. We have found two new *Pteropus* this spring. Halsted is now in Michigan where he is to assist Prof. B. C. Cooke in botanical documentation without help I do not know how I shall get along with my collecting. Has *Puccinia Anemone* been turned up yet?

Yours, truly,

W. G. Harlow
