About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

ADDRESS REPLY TO
DIRECTOR
AND REFER TO

RPLZ

MADISON, WISCONSIN

May 12, 1924

Professor Arthur J. Eames
Department of Botany
Cornell University
Ithaca, New York

Dear Professor Eames:

Reference is made to your letter of April 25.

Under separate cover I am sending you the photo-
micrographic prints. Let me know if the collection sent
fulfills your needs. There is no charge for these prints.

Acknowledgment of the source of the illustrations should
include the statement that they were obtained "through the
courtesy of the U. S. Forest Products Laboratory of Madison,
Wisconsin, from the collection of the Office of Wood Technology."

I was in Chicago Friday, giving a talk to some
teachers at a conference held at the University of Chicago.
(Arthur J. Eames)
They were quite excited over Professor Noe's coal balls. They
think that Berry's criticism recently was a bit severe. Are
they Monocots? If so, were their earlier dicots? What do you
think on this subject?

Professor A. J. E.

Why don't you come to Wisconsin and teach in summer school sometime? It is a very nice place to be in summer.

I shall certainly be very much interested in the forthcoming book.

With best wishes to Mrs. Eames, Dr. MacDaniels and yourself, I am

Very sincerely yours

ARTHUR KOEHLER, In Charge
Office of Wood Technology
