About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

No 119

Botanical Department, Northern India.

6 Dec. 1887

Salaranpura

N.W. Prov. India.

Dear Sir

HACKEL

I have sent through the
Hart, Austria Hungarian
Steamer Co. at Bombay
a parcel of specimens

collected during my recent
tour in N.W. India, which
I hope will reach you safely
in due course.

I shall be very much obliged
if you will, when you have
leisure, let me have the
correct names of those that
I have not been able to
identify. I do not wish
any of the specimens returned.

^{report}
~~Now~~ ^{book} I am writing
on the Dodder plants of N.W.
India will be ready in
March next, & you shall
receive a copy as soon

as it is published.

I am

Dear Sir

Yours very truly

J. D. Duthie.
