About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

DAVID FAIRCHILD
THE KAMPONG, 4013 DOUGLAS ROAD
COCONUT GROVE, FLORIDA

Jan. 14. 42
Dear Dr. Menninger.

Yours Your interview is the
best I ever saw printed. I
read it to Mrs Fairchild &
she said "Just like you
dear Doctor"

I am pleased and en-
couraged with your interest
in what we are trying to
do here to keep alive a
center of aesthetic things that
are living - not merely things
made by human hands - fine
as these are.

The dark clouds over

the Ovisut are Ominous enough.

Did you ever stop to think how impenetrable will be that world of superb beautiful plants, scenes, animals etc where the Japanese take over the Dutch East Indies? None of us have been wise enough to learn their language & difficult ^{about them} signs and their literature will be closed to the English speaking world.

In 1844 the U.S. sent an Admiral to Berlin to teach the Germans how to build a Navy ~~the had none~~

In 1912 only 4 years after the first public airplane flight Curtis had officers from the Japanese Navy at Hammondsport

DAVID FAIRCHILD
THE KAMPONG, 4013 DOUGLAS ROAD
COCONUT GROVE, FLORIDA

Teaching them to fly & to make
Airplanes.

There is no use trying to solve
Wars by mechanical means.

They get worse & worse
War is an insanity of the
human animal and hates are
the breeders of combat and
war. To hate is to yield
to ones animalistic nature to
bark and bite.

But I am no bracher
even if my father and two uncles
were.

Sincerely

David Fairchild.
