About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

My dear Prain,

From a crustly high pile of
letters to answer I take yours
first. I'm had congestion of
the lungs & inflammation of the
antrum. I thank you so much
for your kind notes; your
sympathy almost reconciles me
with illness.

I may be back in London next
week, but progress is so
slow that I doubt it. Will
you therefore please cause to
be sent to me the paper
(or book) by E. Griffiths &

Exchange of
Notes
Kaye on Thermal conductivity and
I will answer your question
to the best of my ability & as
soon as I can.

With kind regards.

Yours

Percy Groom.
