The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

STATE COLLEGE OF WASHINGTON

DEPARTMENT OF PLANT PATHOLOGY

PULLMAN, WASHINGTON

August 12, 1955

Dr. W. Winfield Ray
Department of Botany
University of Nebraska
Lincoln 8, Nebraska

Dear Dr. Ray:

We wish to bring our departmental file of reprints up to date, including those of yours which we have not previously received. We are primarily interested in those dealing with mycological and plant disease material. These reprints will become the property of the State College of Washington and will remain permanently in bound volumes in the library of the Department of Plant Pathology. These reprints may also be read by students and staff members of the other allied departments here at W. S. C.

Reprints listed below are those which we already have.

Contribution to knowledge of the genus *taphrina* in North America.
Repr. from *Mycologia* 31(1) Jan. Feb., 1939

A new host for *Taphrina dearnessii* and geographic distribution of *taphrina* on North American maples. *Mycologia* 32(3) 408-414 May-June 1940

Overwintering of *Taphrina Robinsoniana*. *Phytopath.* Dec. 1938 28(12)
919-922 Dec. 1938

Pathogenicity and cultural experiments with *Caliciopsis pinea*. Repr. from
Mycologia 28(3) May-June 1936

Some common edible and poisonous mushrooms. *Cornell Ext. Bulletin* 286
Revised June 1946

We certainly would appreciate receiving any others which are still available.

Sincerely,

Seth Barton Locke

Seth Barton Locke
Plant Pathologist
