The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear M^r Carille

you will find here enclosed
an exact transcription of Ortega's
description of *Senecio glauca*
together with ~~the~~ tracing of
its corresponding plate

I am glad to hear that my
specimen of *Tetradymia* has
answered your purpose and
has been placed in the national
herbarium.

Allow me, at the same time,
to ask you if it would still
be possible for me to get

from the U.S. Department
of Agriculture the following
numbers of the Contributions
to the National Herbarium:
1^{ly} number 1 of vol. 1, which
is unfortunately missing in my
library.

2^{ly} ^(but this is less important) Numbers 2 and 3 of same
vol. 1 which I already possess
but which I have by mistake
had bound with other botanical
works.

Lastly would you kindly
let me know if vol. 1st
of that publication ends with
number 8 and vol. 2 with

numb 3 ?

Hoping you will excuse
my troubling you with all
this, I remain, dear Sir,

Yours very sincerely

C. de Candolle
