About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Dear Dr. Safford:

Herewith I send list of
modern scientific names for those birds that
I was not able to identify yesterday from
memory. Three I do not find; possibly
we made an error in transcribing them.

I have laid out two papers by
Bertoni and the volume of the Anales
Científicos Paraguayos to go to you. ^{These are my own.} Also
shall return Azara on Historia
Nat. Páxaros Paraguay to library of
Congress. It may be well to wait a
few days before requesting it to give
time to get it on the shelves again.

If I can be of further assistance let
me know. Good luck!

Sincerely yours
A. Wetmore

Buteo pterocles = *Buteo albicaudatus*

Circus coronatus = *Harpyhaliaetus coronatus*

~~*Circus*~~
