About the Institute
The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Library of the
U. S. Department of Agriculture
Washington, D.C.

Dear Librarian:-

One of our research workers needs the following books:

British Antarctic ("Terra Nova") Expedition, 1910, Natural History Reports, Zoology, vol. 2 only, probably published in 1915.

Archiv für Naturgeschichte, vol. 91, Abt. A, Heft 2 only, 1925, or may have been published in 1926.

Digitized by Smithsonian Institute for Botanical Documentation

Please send these as an interlibrary loan to

Yours truly,

T. J. Fitzpatrick, Librarian
Department of Botany
