About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

U. S. Nat. Museum.

Dear Mr. Bell:

Mr. Nelson says you want to see the proof of *Salix*. Will you please look over the enclosed & return it to me at your earliest convenience?

Mr. Nelson ~~only~~ made only those changes in your *Mss.* which were necessary to make it conform to the rest of the book. I am very glad that you were able to help us out in this very efficient way.

yours truly

John M. Coulter

Division of Agrostology,
Washington, D. C.

Dear Sir:

We are in receipt of your letter of recent date and in reply would say, we have crossed off from the list which you sent us the numbers of the Botanical Gazette which we can not supply. We can furnish you all the others at any time on receipt of your order. The regular price of a single copy of the Botanical Gazette is 40 cents. We shall be glad to furnish you these numbers, providing you wish them all, at the annual rate which is \$4.00 for twelve numbers.

Very truly yours,

THE UNIVERSITY OF CHICAGO PRESS.

W. R. Harper

Feby. 8. 1905.

Prof. John Marble Coulter,
Univ. of Chicago, Chicago, Ill.

Dear Prof. Coulter:--

I have a short article containing descriptions of three or four new willows about ready for the press. I should like to publish it in the Gazette and wish to know the practice of that journal in regard to illustrations. I am having a drawing of each species prepared and think it will amount to the equivalent of two full-page plates. The drawings can be used as two plates or as four text figures as is most desirable. The text will probably occupy about three pages, possibly a little more. When will it be possible to insert this article and is it the custom of the Gazette to have cuts made free where drawings are sent? If not, should drawings be sent to the paper or cuts made here and transmitted with the mss.?

Very sincerely yours,

Feb. 8, 1905

The Botanical Gazette

February 10, 1905.

My dear Mr. Ball:-

I have yours of February 8 in reference to the article on new willows. We shall be glad to receive it for the Botanical Gazette, and will publish it as soon as we can reach it. Of course we have a large amount of accepted material on hand, but such a short article as this one can often be slipped in out of its chronological order.

All you need to do in the way of illustrations is to send us your drawings with the manuscript. Our own engravers will make the blocks.

Yours sincerely,

John M. Coulter
