We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Prof. Leroy H. Harvey,
Hull Botanical Laboratory,
University of Chicago,
Chicago, Ill.

Dear Prof. Harvey:

I have just examined with much interest your paper in the October number of the Botanical Gazette, entitled "Floral Succession in the Prairie Grass Formation of Southeastern South Dakota." This is a section with which I am quite familiar and in which I am still doing some official work. I spend three months of each year in the plains region and am still much interested in its floral aspects. If you can kindly send me a copy of this paper, I shall highly appreciate the courtesy. I would send copies of some of my own papers were I sure that you are still at the University of Chicago. As soon as I learn your correct address, I shall take pleasure in forwarding them to you. They have to do mostly with willows and grasses.

Very sincerely yours,

RMK

Agronomist in Charge
of Sorghum Investigations

April 9, 1910

Prof. L. H. Harvey,
Department of Biology,
Western State Normal School,
Kalamazoo, Mich.

Dear Professor Harvey:-

On December 12, 1908, I asked you for a copy of your paper entitled "Floral Succession in the Prairie Grass Formation of Southeastern South Dakota," promising you copies of some of my own papers as soon as I learned your correct address. You very kindly forwarded the

paper and I find in my mailing list an address bearing your name, but no indication that I sent you any papers.

If you will kindly inform me, under enclosed stamped envelope, whether any were received and, if possible, what ones, I shall be under much obligation.

I would send another set at once without writing, together with some published more recently, were it not that some which I wish to send you are getting scarce.

Very sincerely yours,

GRB-MH

Western State Normal School

LE ROY H. HARVEY, PH. D.

4/11-10.

Dr. Charles R. Ball,
U. S. D. G.,
Washington, D. C.

Dear Dr. Ball:

I seem to have no record or recollection
receiving any separate from you. I should deeply
appreciate them and should I find them in
duplicate when filing it will be glad to return
them to you.

Sincerely yours
Le Roy H. Harvey

Dr. LeRoy H. Harvey,
Western State Normal School,
Kalamazoo, Mich.

Dear Dr. Harvey:-

Your letter and paper entitled, "The Floristic
Composition of the Vascular Flora of Mount Katahdin, Maine,"
were duly received. Please accept my hearty thanks for
your courtesy in this matter.

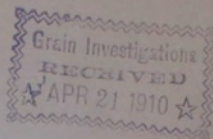

Very sincerely yours,
