The Hunt Institute is committed to making its collections accessible for research. We are pleased to offer this digitized item.

Usage guidelines

We have provided this low-resolution, digitized version for research purposes. To inquire about publishing any images from this item, please contact the Institute.

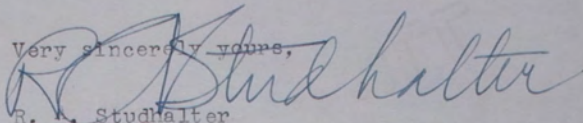

About the Institute

The Hunt Institute for Botanical Documentation, a research division of Carnegie Mellon University, specializes in the history of botany and all aspects of plant science and serves the international scientific community through research and documentation. To this end, the Institute acquires and maintains authoritative collections of books, plant images, manuscripts, portraits and data files, and provides publications and other modes of information service. The Institute meets the reference needs of botanists, biologists, historians, conservationists, librarians, bibliographers and the public at large, especially those concerned with any aspect of the North American flora.

Hunt Institute was dedicated in 1961 as the Rachel McMasters Miller Hunt Botanical Library, an international center for bibliographical research and service in the interests of botany and horticulture, as well as a center for the study of all aspects of the history of the plant sciences. By 1971 the Library's activities had so diversified that the name was changed to Hunt Institute for Botanical Documentation. Growth in collections and research projects led to the establishment of four programmatic departments: Archives, Art, Bibliography and the Library.

Hoping that these few hints will be of some service to you
and promising to write a more personal letter shortly, I am

Very sincerely yours,

A handwritten signature in blue ink, appearing to read "R. A. Studhalter". The signature is fluid and cursive, with the first name "R." and last name "Studhalter" clearly distinguishable.

R. A. Studhalter

Ex-Sec.-Treas.

The Sullivant Moss Society

Your card concerning stationery arrived this A.M. I don't need envelopes but I do think I should use A.B.S. letterhead paper for letters to members of the exchange, etc.; for this, a couple hundred sheets would hold me for some time.

Best regards,

E. H. Ketchledge

My dear Mr. Roberts:-

The Succowab Moss Society was originally
created by me as a "Chapter" of the "Agassiz
Association". As the members grew older they
naturally preferred to be independent, and
very courteously made me an Honorary Member,
with free subscription to your valued "Bryologist".

Cordially Yours,
Harlan H. Ballard, Hon. V. Secy. Agassiz Assoc.

Please pardon the suggestion that
the addition of your address,
(which I find from the "By-laps" for 1932,)
to your letters of inquiry would
facilitate replies. B.
